

WET 1: CASTLE COMBE AUTUMN CLASSIC

Dr. John's images capture the undampened spirit of the day!

Club member's and their cars were well represented at a damp but very successful Castle Combe Autumn Classic, as illustrated by our own Dr. John's photos.. To quote the circuit's own press release: "With seven electrifying races, awe-inspiring historic vehicle demonstration laps and an unending array of static car displays, it's fair to say 2018's Autumn Classic race meeting – held at Castle Combe Circuit on 6th October – successfully combated the particularly damp weather that descended on the Wiltshire circuit for the day.

One of the highlights of this year's step-back-in-time for the thousands of classic car fans that made the annual pilgrimage was the Dream Garage paddock in the middle of the venue's display area. This time celebrating Le Mans winners, the area was dominated by ex-competition Ford GT40s that were there to commemorate the car's outright win at Circuit de la Sarthe back in 1968."

WET 2: GT40 ownership: Living the (wet) dream!

Just an average summer day in the South of France for Paul Walton and co-pilot Phil Drucker . Who was the wag who said: "All GT40s are guaranteed water tight and the seat swab repels water!"
